

TollfreeIndia Micro IBS for Shops, Showrooms, Large Offices and Apartments

Having trouble with cell phone reception on your office floor, showroom, or high-rise apartment?

 Without TollfreeIndia Micro IBS

 With TollfreeIndia Micro IBS

TollfreeIndia's Micro IBS solutions can **provide complete** cellular coverage **solutions** and help eliminate call drops. **Micro IBS is a passive cellular solution that can be implemented in smaller areas ranging from 3,000 sq. ft. to 50,000 sq. ft.**

Not only does this address your wireless communication needs, but it is also the most cost effective solution today!

TollfreeIndia works with the premise owners, architects, contractors and consultants to seamlessly incorporate an end-to-end wireless network in your premises. Once this is done and you are ready to occupy the premises, TollfreeIndia will contact the service providers of your choice and initiate and facilitate interconnectivity with your Micro IBS network.

TollfreeIndia takes the time to understand your specific requirements and fulfills them by customizing a solution that is right for you.

Our team of professionals and specialists will ensure that:

- All **aesthetics** including structural and engineering designs are **preserved** as per original approved plans keeping in mind the dynamic mechanical and electrical needs of various projects.
- A **single homogenous network supports all existing and future services** and technologies that support multiple service providers. This will ensure that duplication of networks and additional cabling is avoided, and all the service providers will share one single IBS infrastructure.

For more information or to set up a consultation or survey of your premises, please get in touch with:
